

Australian-made for Australian adventures...

Head off on your next Australian adventure in a purpose-built Australian-made 5th wheeler caravan. Winjana RV offers you a safe and comfortable 'home away from home', stylish superior quality fittings and furnishings - all at an affordable price.

5th wheeler specialist

Winjana RV 5th wheeler vans offer you peace of mind – they provide you with extra safety through easier manoeuvring, hitching, viewing and parking; and a shorter overall vehicle and towing length. All vans are built in Toowoomba specifically for Australian road conditions, with quality and comfort in mind to ensure happy holidays and adventures. Travel safely in style with a Winjana RV.

WINJANA RV MODELS

5th Wheelers - all rough-road ready

Cattai 760	Ormiston 630
Kalbarri 690	Strzelecki 550

Winjana RV is based in Toowoomba, Queensland, and all vans are built on-site at the factory. Winjana RV has been building and manufacturing caravans since 2000. Winjana RV provides personal and customer-focused friendly service, and after sales service and spare parts, repairs, maintenance and van servicing. Winjana RV have designed and manufactured Australia's first 'hybrid' 5th wheelers (a cross between a 5th wheeler and a conventional van); the 'cargo' models which allow for additional, easily accessible, storage space; and purpose-built offroad models. All vans are built to be off-road ready. Custom-built vans and optional extras are available for our clients. Come visit us in Toowoomba and see a van being built.

5th Wheelers – What are they?

Winjana 5th wheelers are renowned for being a very safe and easy van to tow and manoeuvre. This is why they are growing in popularity for Australian caravan enthusiasts. The principle is really quite simple, and has been around for many years - the hitch weight is positioned over the rear axle of the tow vehicle, providing correct loading (weight distribution). By loading the tow vehicle here instead of the draw bar it allows up to 700kg extra payload in the van. Most Winjana vans allow up to 1000kg of payload. The other benefits, in addition to safety are: no 'swaying', allows sharper turning (up to 90 degrees), easier visibility when parking or reversing, shorter overall length (can save up to approx 2m of length without compromising internal length), much easier hitching and unhitching (a quick and easy job that one person can do), reduced 'drag' due to no big gap between the tow vehicle and the van, increased fuel economy, less likely to be stolen (as they would need a hitch the same as yours), and you don't need load levellers or sway bars.

"Our vans are named in recognition of Australia's outstanding National Parks – enjoy exploring them with Winjana RV!"
